Frank Seeley AM FAICD
2011 South Australian of the Year,
Founder and Executive Chairman.

With a history of innovation and quality, the Breezair range, manufactured by Seeley International, delivers quiet and powerful cooling that's energy efficient, so it's kind to the environment as well as to you.

The first corrosion-free, all-plastic rooftop evaporative air conditioner, and the first and only evaporative air conditioner with mega-energy-saving inverter technology, Breezair is the market leader in Australia and leads the world in evaporative cooling technology.

Breezair is one of the many leading brands manufactured by Seeley International, Australia's largest air conditioning manufacturer. 100% Australian owned, Seeley International now exports Australian-made products to well over 120 countries under the award-winning brand names Braemar, Climate Wizard, Coolair, Convair as well as Breezair.

Today, more than ever you can trust Breezair for keeping your home cool without costing the earth, all with a reassuring 5 year warranty.

Cooler. Fresher. Quieter.

Your home deserves the finest ducted evaporative air conditioning available.

So it makes good sense to choose the revolutionary Breezair Icon - the world's quietest and most efficient ducted evaporative air conditioning system.

The technology built into Breezair is the best in the world and your guarantee of the ultimate in comfort, economy and cooling power.

Install Breezair... it's the name you can trust.

“Our system has been amazing, it is so much quieter than our neighbours’. Great value for money and very economical. Received my first power bill (after the hottest summer on record) and was very pleased.

Michelle, WA

Why choose evaporative air conditioning?

Save on your electricity bill

Imagine being able to keep your family comfortably cool all summer long for as little as \$37 per year in electricity costs*. That’s a saving of \$346 per year in electricity costs when compared to a standard efficiency ducted refrigerated system!

Wherever you live in Australia, Breezair technology will cost less to cool your home than any other comparable system.

Icon’s world-renowned cooling efficiency uses much less energy. Breezair’s Icon evaporative air conditioning system is so efficient it costs less than one tenth of a standard ducted air conditioner to run.

It’s little wonder that with Breezair, you can cool your entire home from as little as the cost of running a light globe.

100% fresh air

Step inside a Breezair-cooled home and you’ll quickly notice how refreshingly cool it feels.

One of the major benefits of Breezair evaporative air conditioning is the way it fills your home with fresh, filtered, cool air – it’s as natural as a soothing sea breeze.

Unlike refrigerated systems, Breezair does not continually recycle stale air – it actually completely replaces the air within your home every few minutes.

Cool both indoor and outdoor living spaces with one system

Summer is for living! For those who enjoy entertaining outdoors, for families with children, and for people who simply prefer fresh rather than recycled air, Breezair is unquestionably the best choice.

That’s because only evaporative air conditioning allows doors and windows to remain open whenever it is operating. Cooling performance is unaffected by people coming and going, which makes Breezair a perfect companion to the relaxed Australian lifestyle.

Annual Running Costs for Whole of Home Air Conditioning

*Based on a 166m² home. Approximate cost per annum, based on 300 hours usage and a 60% duty cycle for air conditioners. Based on electricity tariff of 28c/kWh. Note – evaporative coolers will also use water.

Source: Sustainability Victoria, 'Cooling Running Costs', www.sustainability.vic.gov.au, 2013.

Breezair... better because

Breezair evaporative air conditioning is ideal for asthmatics, children and the elderly because it continually circulates a fresh supply of clean, filtered air throughout your home.

Why choose evaporative air conditioning?

Look after the environment

The power consumption of just one ducted refrigerative air conditioner can result in up to 1.6 tonnes of harmful CO₂ being pumped into the atmosphere each year.*

On the other hand, Breezair's Icon evaporative air conditioning system is so efficient it produces less than one tenth of this volume.

By choosing Breezair, you can help reduce the amount of harmful greenhouse emissions entering our environment.

A healthy choice for you and your family

For air conditioning that fills your home with fresh, cool, clean air, Breezair is unquestionably your best choice.

That's because Breezair completely replaces the air within your home every few minutes. Fresh air is drawn through moistened Chillcel® pads where it is filtered and cooled before being gently circulated throughout your home.

It's a process as natural as a sea breeze, giving you continuous fresh air instead of stale, recirculated air from a refrigerated system.

It's also much gentler on the eyes, nose and skin because evaporative air conditioning doesn't have the aggressive drying effect that occurs with refrigerated systems.

WATERMiser™ monitors water quality to reduce consumption, minimise waste and eliminate unnecessary dumping of water

CO₂ Emissions for Whole of Home Air Conditioning (kg/yr)*

*CO₂ emissions based on 1.17 kg CO₂ e/kWhr electricity purchased from grid for Victoria

Breezair – why there is nothing else in its class!

Save even more with the only evaporative air conditioner with Invertacool™ technology

Trust Breezair to be the first, and only, evaporative cooling system with mega-energy-saving Inverter technology. Breezair's Invertacool™ is an amazing innovation that saves you money on operating costs year after year, after year.

Invertacool™ cleverly manages power consumption which adds up to greatly reduced energy use, improved performance and genuine cost savings...and, only Breezair has it!

Nothing cools as quietly

The thing you immediately notice about the world class Breezair Icon series is how wonderfully cool it makes your home feel, and how quietly it operates – it's incredibly quiet.

In fact nothing comes close to the unobtrusive cooling power of the Breezair Icon series.

It's all thanks to the superior design of Breezair's ground-breaking centrifugal fan and Hushpower motor, a global revolution in air conditioning engineering.

Old-fashioned axial fan systems are noisy because they spin like helicopter blades which creates air turbulence.

Australian made quality

Breezair's engineering sets a new standard for cooling performance and reliability. Whether you live in Birdsville or Bondi, Icon's leading-edge cooling technology won't let you down. That's because Breezair is designed and built in Australia to withstand even the harshest Australian summer. With rugged and clever design features such as these, Breezair will keep you and your family comfortably cool for years to come...

- Corrosion-free materials
- Injection moulded cabinets and components that will not rust or fade
- UV stabilised polymers
- Long life Chillcel® pads
- Revolutionary WATERmiser™ monitor
- Powerful Tornado® pump
- Amazing auto Clean and Dry function
- Anti-clog water distribution

Looks that are built to last

Designed to blend discretely with the roofline of your home, Breezair's world renowned Permatuf® cabinets look great and won't crack, peel or warp.

Manufactured in Australia from UV stabilised polymer, the injection moulded cabinets are virtually impervious to our harsh climate and will retain their good-as-new looks year after year.

Superior design for better comfort

The Breezair Hushpower motor and centrifugal fan combination is better designed, better built and simply does the job a whole lot better as it pushes a strong, even flow of fresh, cool air to all corners of your home.

Internationally acclaimed as the world's quietest and most innovative fan system, Icon's whisper-quiet operation is remarkable. There's barely a sound inside or outside your home - so not only will you love the way Icon quietly cools, your neighbours will too!

Why buy from a Breezair dealer?

Your Breezair dealer is the expert...

They'll help you choose a system that's exactly right for you*

Get the right sized system for your home with CompuComfort®

For a smarter design CompuComfort® is another brilliant example of Seeley International innovation.

Exclusive to your Seeley International dealer, the intelligent CompuComfort® design program uses a unique web application to accurately profile your home's key architectural aspects. CompuComfort® considers a variety of factors such as solar and thermal gains, and insulation values; in so doing it ensures the optimum system is specified for your unique requirements.

The name to trust

For over thirty years Breezair has been globally acknowledged as the leader in evaporative air conditioning technology – technology that Breezair exports around the world and expertise you can rely upon to quietly cool your home through even the harshest Australian summer.

* Breezair is only available through authorised Seeley International dealers.

Industry leading warranty and quality control standards

For complete peace of mind, a rigid quality control testing policy to Australian Standard ISO 9000 ensures that Breezair Icon series air conditioners live up to their hard earned reputation for outstanding reliability.

5 YEAR
GENERAL WARRANTY

10 YEAR
STRUCTURAL WARRANTY

25 YEAR
PERMATUF CABINET WARRANTY

For additional peace of mind, Breezair backs every one of its air conditioning systems with an industry leading comprehensive warranty program - including 10-years on all structural components, plus a hefty 25-year cover on the Permatuf® cabinets.

The range

Breezair, a better option

When it comes to choosing a cooling system for your home the advantages of the Breezair Icon Series are simply too good to ignore.

Superior comfort, better economy, outstanding efficiency, unsurpassed reliability,

clever convenience benefits, ease of use... it's easy to see why the technological excellence built into every Breezair Icon series model is unmatched anywhere or by any other brand.

Why Breezair is better for your lifestyle

Breezair

Cost

Economical – significantly lower operating costs.

Cooling

Natural airflow is ideal for asthmatics, children and the elderly.

Operation

Continuous flow of fresh clean filtered air – completely replaces air every few minutes.

Lifestyle

One system cools both indoor and outdoor spaces.

Refrigerated

Can cost as much as 9 times more to operate than a Breezair system.

Dries the eyes, skin and household plants.

Re-circulates stale air. Potential for bad odours and unhealthy environment.

Doors must be kept closed to cool the indoor space only.

Colour range*

Slate grey

Beige

Terracotta

Heritage green

* Model EZH215 is available in slate grey and terracotta colours only.

Breezair® specifications and cooling performance in kW

| Model | Nominal Power Motor (w) | Width (mm) | Depth (mm) | Height (mm) | Shipping Weight (kg) | Actual (kW) of cooling |
|--------|-------------------------|------------|------------|-------------|----------------------|------------------------|
| EXH130 | 500 | 1160 | 1160 | 660 | 71 | 8.4 |
| EXH150 | 550 | 1160 | 1160 | 860 | 77 | 9.8 |
| EXH170 | 750 | 1160 | 1160 | 860 | 77 | 12.6 |
| EXH190 | 1100 | 1160 | 1160 | 860 | 77 | 14.4 |
| EXH210 | 1500 | 1160 | 1160 | 860 | 78 | 15.5 |
| EZH215 | 1500 | 1160 | 1160 | 1240 | 89 | 15.4 |

The above data was drawn from Meridian Laboratories test analysis. The testing was performed by a NATA accredited laboratory to the requirements of the Australian standard AS2913-2000 "Evaporative Air Conditioning Equipment. Achievable with ambient 38°C DB, 21°C WB, room temperature 27.4°C.

Cooling performance comparison

Seeley International, manufacturers of Breezair, has tested its Evaporative Coolers according to AS2913-2000. This is the Australian Standard for the testing of Fixed Evaporative Air conditioners and demands that all such air conditioners be tested as complete units. The standard states in clause 3.1.1d-1 "Performance ratings relate to the actual performance of the fully assembled equipment as supplied, not to the component parts prior to assembly." Australian Standard AS2913-2000. All test results commissioned by Seeley International of both their own and competitive air conditioners, have been carried out in this prescribed manner. Based on AUSTRALIAN STANDARD mandatory testing procedure, published above are the actual cooling performances for various Breezair models.

Features and benefits

New Icon® Series fan

- Combined motor and fan
- Ultra-quiet centrifugal fan
- Responsive to duct sizing and back-pressure
- Designed to deliver optimum air output

Hushpower® direct drive motor

- Exclusive to Breezair
- Incredibly quiet and efficient throughout operating range
- Uses far less energy
- Unsurpassed reliability
- Corrosion-proofed throughout

Non clogging water distribution

- Unique design ensures constant, even pad saturation
- Maximises the cooling effect - outperforms competitive products

Clean and dry function

- Automatic water draining when the system is not in use
- Prevents algae growth
- Avoids the seasonal maintenance required by competitive products

WATERmiser™

- Uses the minimum amount of water to achieve high efficiency cooling
- Water quality monitoring for significant water savings
- Leak detection monitor

Power control module

- Advanced electronics ensure maximum efficiency
- Microprocessor constantly analyses water quality, water consumption and power output
- Smart, reliable and durable

Tornado® pump

- Australian designed and manufactured
- Exceptional reliability in extreme conditions

Weatherseal®

- Automatic sealing system
- Reduces draughts and dust
- Reduces need for winter cover

Mirage rooftop unit

- The Mirage models' raked-base design and low profile hugs the slope of your roof
- Virtually invisible from street-level

Long life Chillcel® pads

- Honeycomb design optimises the cooling effect
- Durable design outlasts competitive products

Optional extras:

Firewall Auto-seal

- Helps prevent ember attack in bushfires
- Metal flap that isolates the cooler from the duct work
- When fitted, the Breezair unit complies with
 - Bushfire Attack Level rating BAL-LOW through to BAL-29 (AS3959)
 - The Building Code of Australia

Firewall ember screen

- Helps guard against ember attack in bushfires
- Made from non-combustible mesh
- Maximum aperture of 2mm
- Can be fitted to existing cooler pad frames
- Minimal reduction of air flow of 5%

Everything about the Breezair Icon series points to outstanding performance. In fact no other evaporative air conditioning product offers such world-class technology.

Seeley International

Seeley International is Australia's largest air conditioning and ducted gas heating manufacturer and a global leader in developing ingenious, energy-efficient cooling and heating products.

Our vision is to lead the world in creating climate control solutions which continue to be highly innovative, of premium quality and inspirational in their delivery of energy-efficiency.

But it's more than just a vision... it's a way of life!

A commitment to innovation and excellence is at the heart of all that we do. Our success in delivering on that commitment has been recognised by our many awards and our expanding global presence. Seeley International now exports to well over 120 countries. Not bad for a company that started out in 1972 in the garage of its founder and Executive Chairman, Frank Seeley AM FAICD, who was named South Australian of the Year for 2011!

*Haier air conditioning products are proudly distributed by Seeley International throughout Australia.

To locate your nearest accredited Breezair dealer call 1300 360 651 or go to breezair.com.au

Please visit www.breezair.com.au to find out more about our current promotions.*
